Providence, RI 02909

Dear Mike Donatelli,

This letter is intended to express the appreciation of both Site Specific and the Rhode Island School of Design for the work that was recently completed at Carr House. It was only through careful coordination, planning, and the diligent work that this project was completed successfully. The extra time and thought that was devoted to this project by Site Tech exceeded our expectations and has been recognized by Site Specific, Ed Wojcik Architect, and RISD.

From the beginning of this project, it was clear that every workday needed to be utilized to the fullest degree in order to successfully perform this amount of work in a small space in such a short duration. Logistical and technical challenges arose regularly on this project due to the compressed schedule, close working quarters, and the nature of the existing building. Regardless of the challenges and setbacks that arose throughout the project, Site Tech rose to the occasion and enabled Site Specific to present RISD with a finish product that will be loved by RISD and the building users for years to come.

Thank you,

Zack Pilcher – SSSLIC Assistant Project Manager

---

Matt Dempsey – SSSLIC Owner

---

Paul Mullen – RISD Facilities Director
